

Solar Mounting Solutions

Metal Shingle Roofs

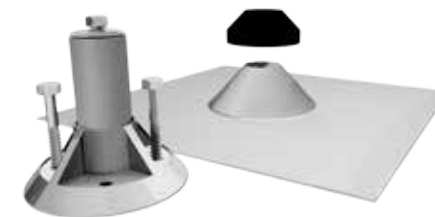

Quick Mount PV offers several products for installing solar panels on metal shingle roofs. The QBase technology is a multi-purpose base-and-post style solar mounting system offering superior strength and waterproofing for metal shingle, shake and slate tile roofs. The base-and-post mounts work with all standard rail-based racking systems and are fully engineered to meet code requirements and industry best practices.

TECHNOLOGY BENEFITS

- Exceptional shear and pullout strength
- Proven waterproofing
- QBase® technology is the strongest off the shelf mechanical mount
- Aluminum cone flashing with no welds or seams to rust
- Meets or exceeds roofing industry best practices
- 100% IBC compliant

QBASE PRODUCTS FOR METAL SHINGLES
